Android mobile photo recovery software free

l'm not robot!

Stop using your phone for taking more photos/videos, stop sending messages or doing anything on the phone, remove the sd card from Android mobile since any further use of the phone may result in permanent data overwritten. We do not recommend you download android photo/video recovery apps since it is kind of data overwritten too. A computer is recommended as a better android data recovery solution. If the photos, videos, messages are stored on the android internal memory, please jump to part 2. This part is focusing on free data recovery from memory card used on android phone when most users stored their photos, videos on the external storage, an sd card, or usually a MicroSD/TF card. What you need for this Android phone memory card recovery? -> A computer (Windows 11/10/8/7), and a memory card reader/adaptor. Question: may I use the mobile to connect the sd card with the computer for a recovery? => Answer: No! A card adaptor is required since most data recovery tools won't detect mobile phones as a storage device. (When your sd card is not showing up in your computer, do connect it with a card reader to computer and try it again.) Or you may connect your phone directly to your laptop if there was a sd card slot built in the computer. Freeware #1 - iCare Data Recovery Free Step 1 - Download iCare Recovery Free, connect your memory card to your computer, open the freeware -> Select 'Advanced File Recovery' for complicated data loss, or 'Deleted File Recovery' for recent deleted files from the memory card in the device list and click next to start scanning Setp 3 - Save found data to another hard disk. Video guide on this page: How to use iCare Recovery Free Tip: if your memory card is over 32GB, you may need to download and use iCare Recovery Pro edition which provides exfat large memory card data recovery and it provides a free edition for all users and a paid pro edition with virutal disk&premium support. This tool has been recommended highly on the cyber world since it had only provided free version in the past decades and it only started to provide a paid edition in recent years. Note: Recuva only provides a Windows edition for android phone memory cards, there is no Recuva for android internal memory recovery. We will introduce some free alternatives in the coming part 2.
